

REBECCA GEORGE

RC.LB.George@gmail.com | (512) 487-0566

EDUCATION

William and Mary, B.S. in Computer Science May 2026
- *Secondary major*: Computational and Applied Mathematics and Statistics (CAMS),
Mathematical Biology track

RESEARCH INTERESTS

Computer Systems, Mathematical and Statistical Modelling, and applications in Ecology, Environmental Sciences, Civil and Environmental Engineering, and Ocean and Atmospheric Sciences

RESEARCH EXPERIENCE

Undergraduate Research Assistant, William and Mary June 2025 - May 2026
Department of Computer Science Williamsburg, VA
Advisors: Jie Ren, Xinxin Mei

- Wrote C++ scripts to benchmark solve times of GPU-accelerated vs. CPU-only versions of sparse linear solvers
- Automated high-performance computing workflows using Bash scripts with PBS job scheduler on Argonne National Lab's Aurora supercomputer
- Ran fio, ior, and mdtest benchmarks to evaluate DAOS bandwidth
- Visualized results with Matplotlib/Seaborn/Pandas in Python

Presented research at CAPWIC '26 poster session; Linear solver work contributed to a paper accepted to IEEE SmartGridComm '26, DAOS work contributed to a paper submitted to PDSW; This work was funded through NSF OAC-2348350.

Undergraduate Research Assistant, William and Mary August 2023 - May 2024
Department of Biology Williamsburg, VA
Advisors: M. Drew Lamar, Harmony Dalglish

- Integrated real genetic identities into a data-driven milkweed population model (integral projection model)
- Selected models for flowering and seed pod production using R
- Created interactive plotly dashboard to explore clonal reproduction characteristics of milkweed using Python
- Prepared milkweed samples for genetic analysis

This work contributed to a paper in preprint on bioRxiv.

PRESENTATIONS

ACM Capital Region Celebration of Women in Computing (CAPWIC), Alexandria, VA, March 2026. Rebecca George, Xinxin Mei, and Jie Ren “Benchmarking DAOS Filesystem on Aurora” (poster)

HONORS AND AWARDS

Dean’s List	Fall 2022 - Fall 2024, Fall 2025 - Spring 2026
Phil Kearns Computer Systems Award	Spring 2026

LEADERSHIP

William and Mary Society of Women in Computing

Secretary	January 2025 - December 2025
– Helped plan meetings, coordinated collaborations with other clubs, kept calendar up to date, and sent weekly emails with club information, outreach information, jokes, career opportunities, and the calendar – Redesigned club website to make it up to date, easy to read, and easy to maintain	

William and Mary Robotics Club

Project Manager	August 2024 - December 2024
– Helped organize and teach robotics club workshops and inventory supplies – Redesigned club website to make it up to date, easy to read, and easy to maintain	

MENTORING EXPERIENCE

Alumni Mentor

FIRST Robotics Competition Team 2881	June 2022 - Present Austin, TX
– Mentored middle and high school students in robot build, design, and CAD using Solidworks after graduating from being a team member (2015-2022) – Aided documentation and continuation of summer camp outreach programs	

Robotics Instructor

Girl Scouts	July 2018 - August 2024 Austin, TX
– Led summer STEM/robotics camps for elementary age Girl Scouts, coordinating volunteer teams and operations – Created lesson plans; taught programming and mechanical design with LEGO robots	

PROFESSIONAL EXPERIENCE

Student Technical Intern

September 2024 - May 2026

Thomas Jefferson National Accelerator Facility

Newport News, VA

- Installed and troubleshoot Mac, Windows, and RedHat Linux operating systems, file backups, applications, and remote access
- Traced logs, ran diagnostic tests, and identified root causes of diverse issues
- Completed many tasks at once, communicating effectively with users and team
- Managed accounts and authentication methods
- Wrote and synthesized documentation, improving accuracy, and user-friendliness
- Maintained PowerShell scripts automating procedures
- Supported data center hardware deployment and tape library management
- Wrote Puppetry supporting scientific computing infrastructure

SKILLS

- *Programming:* R, Python, C/C++, Bash, Powershell, MATLAB, HTML/JS/CSS, Java
- *Software-related:* Linux, Git, OMP, MPI, CUDA, Arduino, ESP32
- *Documentation:* Markdown, LaTeX, Google Workspace, Microsoft Office
- *Computer Aided Design:* Solidworks, Bricklink Studio, Procreate
- *Soft Skills:* Communication, Teamwork, Time Management, Problem Solving, Technical Instruction, Documentation
- *Languages:* English (fluent), German (conversational), Chinese (conversational)
